
FY2025 ALLOCATIONS DIRECTIVES

DIRECTIVES TO THE RECIPIENT:

Ascertain the need for increased mental health and substance use (outpatient) services in Philadelphia and PA Counties*, including surveying existing mental health and substance use (outpatient) providers and their accessibility.

Work with the HIPC's Positive Committee to make available a list of defined RW services by region, especially EFA and EFA-Housing, within all provider offices – clients should be told to call CSU intake or talk to Case Managers for more information on the list; DHH is to make the list available and report back to CPC and Positive Committee at the time of the 3rd Quarter Report.

Increase access to and awareness of telehealth options to medical and social service care; Request more data and information on challenges and successes** for telehealth services by service category as measured by CAREWare to report back to HIPC within the FY.

Encourage outreach to aging populations to ensure they are informed about funded services; look into how PLWH 50+ are receiving information and report back to the HIPC within the FY.

** To collapse the overlapping directive in Philadelphia County and the Pennsylvania Counties, verbiage has been combined to say “services in Philadelphia and PA Counties” as opposed to “services in Philadelphia” and “services in the PA Counties” listed separately in otherwise identical directives.*

*** Additional language “and information on challenges and successes” was established in the Philadelphia County allocations process – the Finance Committee has recommended this language be carried over to the otherwise identical directive in PA and NJ Counties.*
